Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED. (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2031378 (Hogerhuis).

There is disclosed in Hogerhuis a dispensing device comprising: supply means 7, 12 adapted to supply at least two drinks; filling outlets (outlet nozzles) adapted to dispense a drink into a cup; drink pipelines 8, 13 connecting the supply means to the filling outlets; accessory pipelines 18, 19, 25 for supplying and carrying away an accessory fluid (hot water); and valve means 9, 14 for opening and closing the drink pipelines between the supply means and filling outlets and adapted to connect the accessory pipelines (allow flow of hot water) to the valve means in order to flush out the valve means and the supply means.

Allowable Subject Matter

Claims 4-5, 7 and 8 are allowed.

Response to Arguments

Applicant's arguments filed 19 March 2009 have been fully considered but they are not persuasive. Applicant argues that Hogerhuis fails to disclose valve means to open accessory pipelines to the valve means instead of the drink pipelines, or

accessory pipelines that carry a fluid which is either a flushing agent for cleaning or hot water or steam for prewarming.

It should be noted that not only does Hogerhuis disclose hot water as and accessory fluid but it teaches the use of the hot water to clear out any leftover flavoring materials in the valves and supply means (lines 117-119).

Applicant argues that Hogerhuis does not teach or suggest valve means that are adapted to open the accessory pipelines instead of the drink pipelines.

It should be noted that since the accessory pipelines are connected to the nozzles by way of the drink pipelines, when placed in use the accessory pipelines are opened to for discharge by way of the valve means. They are placed in an operative or open position by way of operation of the valve means when the flushing hot water faze is needed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
